

INTRODUCING

reZilient UltraConnect

*New York's first fully integrated fiber optic/microwave radio
ultra-speed broadband connection for businesses.*

Dual Connections Diverse Paths

RELIABILITY

reZilient UltraConnect combines the ultra-speed benefits of gigabit fiber with the reliance of microwave radio technology that provides businesses with the ultimate broadband connection solution. Fiber optic and microwave radio technology is delivered over diverse paths and failover is automatic, providing businesses with the most reliable broadband connection of any provider.

FAST INSTALL

reZilient UltraConnect also provides businesses with the fastest time to install. The microwave radio portion is typically installed within 5 business days and can be used immediately. The fiber optic portion is then seamlessly integrated later with no changes needed by the customer (IP addressing remains the same).

SPEED

reZilient UltraConnect is the ideal solution for businesses requiring broadband connectivity of 10Gbps.
